LangZhong ancient city

-The science and education of Nanchong is prosperous and it is full of talents-

with 3 first-grade hospitals, 6 institutions of higher learning and more than 100,000 college students.

The fresh future of Nanchong, the second most developed city in Chengdu-Chongqing urban agglomeration.

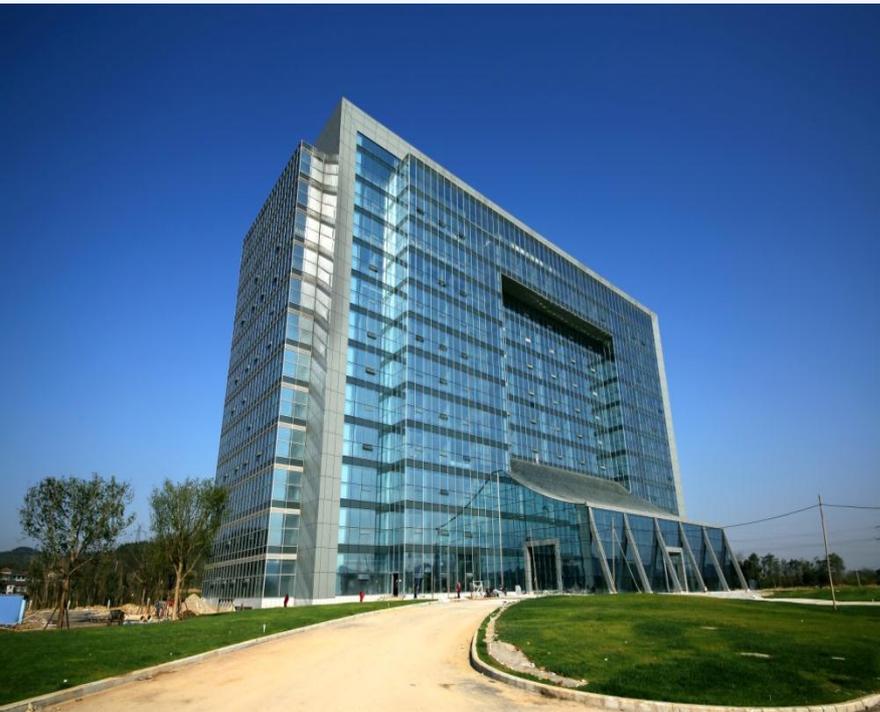

Nanchong "155 development strategy"

- 1 Around the strategic purpose "The fresh future of Nanchong, the second most developed city in Chengdu-Chongqing urban agglomeration".
- 5 To expand and strengthen 500 billion industrial clusters :
 - automobile auto parts, oil and gas, chemical, silk, textile, clothing, modern logistics, modern agriculture.
- 5 Key projects of five major sectors:
 - Urban construction , transportation hub , science education culture and health , tourism industry park.

Nanchong oil and gas chemical industry has a high starting point

Provincial development zone: Nanchong economic development zone in Sichuan province.

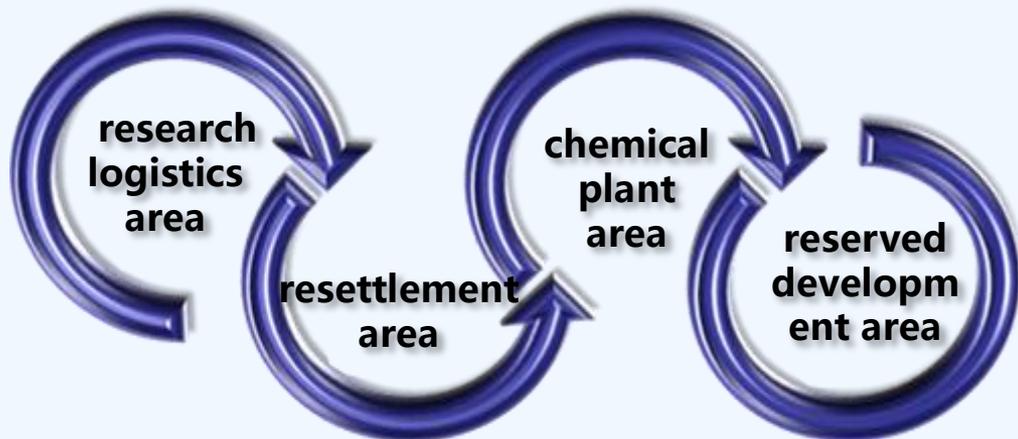

- Provincial development zones approved by sichuan provincial government in May 1993.
- The industrial parks of hundreds of billions that Sichuan “51025” plan to focus on and the first batch of circular economy demonstration parks in sichuan province.
- One of the three petrochemical bases planned and constructed in sichuan province.
- It is a first-class petrochemical technology industrial city in southwest China that is modernized, high-end and innovative.

-An ideal location for developing petrochemical industry-

2025: it is estimated that COD and NH₃-N only use one-fifth of the total amount of remaining water environment, while SO₂ and NO_x use about two-thirds and one-third of the total amount of remaining air environment.

The project has sufficient raw materials and obvious factor support

- Nanchong economic development zone is a chemical new material industrial park with key planning development in Sichuan province.
- Petrochina and Sinopec provide Nanchong with various raw materials and natural gas for the development of chemical new materials,
- with an annual gas consumption index of 4 billion cubic meters.
- Shengda chemical, Lianchengchemical, Shida chemical and other chemical projects can provide raw material support to the park nearby.

—An ideal place for investment with
vast business opportunity—

An aerial night photograph of Nanchong, China, showcasing a complex multi-level highway interchange. The bridge spans a wide river, with light trails from vehicles creating vibrant streaks of yellow, white, and red. The city skyline is visible in the background, with numerous lit-up buildings and a mountain range under a twilight sky. The overall scene conveys a sense of modern infrastructure and urban vitality.

- An open city, a vibrant city , a thriving city-
